

Submission Package Template

Fill this out fresh for every submission (initial + each of the 4 allowed revisions). Keep old versions in git history via the freeze tags, not by duplicating this file.

Submission info

- **Commit hash (frozen):**
- **Date/time frozen:**
- **Revision number:** (0 = initial, 1-4 = revisions)

Coverage

- **Org-number manifest:** path or reference to the exact list of companies included in this submission
- **Total profiles submitted:**
- **Companies attempted vs. completed:**

Run instructions

- **One run command:** e.g. `docker compose run agent`
- **Expected wall-clock for 100-company batch:**
- **Expected requests for 100-company batch:**
- **Expected declared cost (USD) for 100-company batch:**

Models & APIs used

Name	Purpose	Cost basis
------	---------	------------

Licences

- List any third-party data/licence terms relied on (e.g. any paid API ToS, any licensed data source per `docs/source_policy.md`)

Pre-submission checklist

- Pre-freeze checklist in `docs/scoring_and_gates.md` completed
- Idempotency test passes on the actual submission data

- Manual spot-check of 20+ random profiles for wrong-company errors
- Budget instrumentation confirms limits held on a representative 100-company batch
- No fabricated financial values anywhere in the submitted set
- Exactly 100 terminal envelopes produced in the last simulated daily-batch dry run
